

NACE IN-LINE INSPECTION - (ILI)

The world's leading source of training and information on coating inspection organized by IMC engineering S.r.l.

The In-Line Inspection course covers the benefits of utilizing In-Line Inspection, selection of technologies related to operational parameters, operational issues, and evaluating data relevant to assessing fitness for service.

The course is presented in a format of lecture, discussion, and group exercises.

There are no prerequisites for this course but 2 years of pipeline inspection or integrity management experience are recommended.

For more information please contact training@imc-quorum.com

Learning Objectives

- | | |
|--|---|
| ✓ Describe ILI and its relationship to overall integrity assessment | ✓ Define the responsibilities of the operator and/or service provider |
| ✓ Recall relevant industry standards, regulations and best practices | ✓ Be aware of safety and operations associated with running an ILI tool |
| ✓ Recognize the types of ILI technologies and the benefits and limitations of each | ✓ Describe the basics of ILI data analysis |
| ✓ Select an appropriate ILI technology for a given situation | ✓ Respond to and use ILI findings for run verification, remediation and/or repair |
